When the user enters an invalid resource path, show the “Page not found“-Page.

## About Me

Me | Hobbies | Contact

Page not found!

# Task 2 (Advanced): Form Validation

1. When the user clicks on the “Send Message” – button, it is required to check if ...
  - The name input is not empty
  - The email is an actual email address
  - The message has more than 10 characters and maximum of 160 characters.
2. After the button has been clicked and the validation-checks are passed, empty all input text fields and display: “Thanks for your message!”
3. After 5 seconds, bring the user back to the start-page.
